Hi! I'm a product-focussed Software Developer and Manager with ten years of experience in developing and deploying professional web applications across various sectors. Throughout my career, I've managed projects from start to finish and led development teams, while building strong project management skills. Outside of work, I enjoy spending time with my three children and playing drums.

Skills

Languages & Software

- Front-end Technologies: HTML, CSS, JavaScript
- JavaScript Frameworks: Vue, React
- Back-End Frameworks: Laravel, Django
- Version Control: Git

The Startup Institute, NY
2014-2015

Music Business / Creative Performance
Miami Dade College, FL
2006-2009

Work Experience

Musora Media, Remote — October 2020 - January 2025

Lead Engineer: Front-End

- Led a team of front-end developers to create new web experiences for the Musora platform across four brand channels: Drumeo, Singeo, Pianote, and Guitareo.
- Developed the company's Jira workflow, including project boards for functional teams within the Product and Technology departments.
- Contributed as an individual developer, completing key projects such as:
    - **Unified Platform**: Integrated four instrument platforms into one seamless experience.
    - **Custom Playlists**: Enabled students to organize content according to their preferences.
    - **Challenges**: Developed short-form video lessons tailored to busy musicians.

Belk, NC — January 2019 - December 2020

Software Engineer: Ecommerce

- Supported the development of new features within Belk's Salesforce Demandware environment.
- Assisted in creating a Vue component library for common UI elements, enhancing consistency across the platform.
- Facilitated Scrum practices by leading daily stand-ups, managing ticket creation, and overseeing task management in Jira.

Block Digital, NC — September 2017 - March 2020

Business Owner / Solutions Architect

- Developed a platform using Hugo, Netlify CMS, GitHub hooks, and React components to quickly launch static, CMS-friendly websites.
- Collaborated with a design agency to create six responsive business templates built with modular UI components.
- Launched websites for small businesses and religious organizations in the Charlotte, NC area.
- Partnered with a client to launch websites for prominent musical equipment manufacturers, including Fender, Korg and Sabian.
